Program details

1. CERN Technical Studentship (Switzerland; 16 Oct 2026; careers.cern)

4–12 months. Allowance ~3,486 CHF/mo + health insurance + travel + 30 days paid leave. Must have completed 18+ months of studies. No PhD holders.

2. CERN Short-Term Internship (Switzerland; 1 Nov 2026; careers.cern)

Technical or administrative diplomas. Minimum age 18.

3. EPFL E3 Program (Switzerland; 1 Nov 2026; eee.epfl.ch)

Broad Engineering, Science, Tech. CHF 1,800–2,500/mo. Top 10% class rank. Select up to 3 labs.

4. EPFL Life Sciences SRP (Switzerland; 15 Nov 2026; epfl.ch)

Biology, Biophysics, Bioengineering. CHF 3,600 total for 8 weeks. GPA 3.75/4.0 or top 5%.

5. EPFL Summer@EPFL (Switzerland; 29 Nov 2026; summer.epfl.ch)

Computer Science & Communications. CHF 1,800/mo. Dynamic faculty matching.

6. EPFL ERIP (Switzerland; 30 Nov 2026; epfl.ch)

Partner universities only (CMU, Georgia Tech, JHU, McGill, UofT, NTU). Variable stipend.

7. Max Planck MaxSIP (Germany; 1 Nov 2026; mpi-sws.org)

CS, Software Engineering, Data Privacy. Fully funded: stipend + housing + travel. Accepts Bachelor's to PhD.

8. DAAD RISE Germany (Germany; 30 Nov 2026; rise-germany.de)

For US/Canada/UK/Ireland undergrads. Matched with German doctoral students. Monthly stipend + travel + health insurance.

9. DAAD WISE (Germany; Rolling; daad.de)

For Indian nationals. €831/mo. Must independently secure German professor invitation.

10. ISTA Scientific Internships (Austria; Year-round; phd.ista.ac.at)

2–6 months. Fully funded. Biology, Neuroscience, Mathematics, Physics.

11. imec Internships (Belgium; Sept 2026; imec-int.com)

Nanoelectronics and digital technologies. Leuven.

12. Aalto ASCI Summer (Finland; 31 Jan 2027; aalto.fi)

12 weeks, June–Aug 2027. Salary 2,000+ EUR/mo + travel bonus. 50+ positions. Projects posted Dec 2026.

13. RWTH Aachen UROP (Germany; Feb 2027; rwth-aachen.de)

Mechanical and Electrical Engineering. Deep integration into faculty labs.

14. HZDR Summer Student Program (Germany; 24 Jan 2027; hzdr.de)

July–Sep 2027. Helmholtz-Zentrum Dresden-Rossendorf. Lectures + research.

15. ThinkSwiss Research Scholarship (Switzerland; 31 Jan 2027; swissnex.org)

For US, Canada, Australia, Singapore, India, select Pacific Islands. CHF 3,600 total (CHF 60/day). Must secure own host professor.

16. Amgen Scholars (Europe) (UK; 1 Feb 2027; amgenscholars.com)

Fully funded. European symposium at Cambridge. Check individual host institution deadlines.

17. SERP (Leibniz Hannover) (Germany; 1 Feb 2027; uni-hannover.de)

May 13 – July 30, 2027. 12 ECTS credits. €3,150 program fee.

18. LISA (Hannover Medical School) (Germany; 30 Mar 2027; daad.de)

Aug–Sep 2027. Immunology research. €300 total cost incl. accommodation. Travel allowance provided.

19. MIT MSRP (USA; ~20 Jan 2027; oge.mit.edu)

10-week program. US Citizens/Permanent Residents only.

20. Princeton PCCM REU (USA; 15 Jan 2027; pccm.princeton.edu)

June 1 – July 30, 2027. Materials science research.

21. MagLab REU (NSF) (USA; 8 Jan 2027; nationalmaglab.org)

May 24 – July 30, 2027. National High Magnetic Field Laboratory.

22. Caltech SURF (USA; 1 Mar 2027; sfp.caltech.edu)

10-week summer research. Includes stipend and housing.

23. Purdue SURF (USA; Intl: 15 Dec 2026; Priority: 15 Jan 2027; engineering.purdue.edu)

10-week immersive research. International deadline earlier than domestic.

24. Amgen Scholars (US) (USA; 1 Feb 2027; amgenscholars.com)

Fully funded summer research in biology/health. Check individual host institution deadlines.

25. NSF REU (Various Sites) (USA; Jan–Feb 2027 (varies); nsf.gov)

100+ REU sites across US universities. Deadlines vary by site.

26. BYU REU (USA; 6 Feb 2027; reu.byu.edu)

May 31 – Aug 6, 2027. Physics, chemistry, engineering.

27. Mitacs Globalink (Canada; 16 Sep 2026; mitacs.ca)

12-week internship (May–Oct 2027). Up to 300 Indian students funded. Open to all disciplines.

28. Fields Undergraduate Summer Research Program (Canada; 18 Oct 2026; gfs.fields.utoronto.ca)

June 1 – July 31, 2027. Mathematical sciences focus at University of Toronto.

29. OIST Research Internship (Japan; 15 Oct 2026; oist.jp)

Spring 2027: Apr 1 – Sep 30, 2027. JPY 2,400/day + free accommodation + travel support. 2–6 months.

30. Keio Bio2Q Internship (Japan; 1 Dec 2026; bio2q.keio.ac.jp)

8–12 weeks (May 10 – Aug 10, 2027). Accommodation + travel covered. Human Biology-Microbiome-Quantum research.

31. NAIST NAPI (Japan; 16 Oct 2026; napi-naist.github.io)

Nara Institute of Science and Technology. Financial support for travel and allowance. Expanding to DLSU (Philippines) for 2027.

32. NUS IRIS (Singapore; 28 Aug 2026; nus.edu.sg)

2–3 months within Jan–May 2027. Fully funded. National University of Singapore.

33. KUSRP (Koç University) (Türkiye; Opens March 2027; research.ku.edu.tr)

Summer research program. Open to international students including high school, undergraduate, and graduate. Free accommodation.

34. Özyeğin URSI (Türkiye; Feb 2027; ozyegin.edu.tr)

Undergraduate Summer Research Program. Application period: Dec–Feb annually. Housing and lunch provided.

35. KFUPM Inbound Summer (Saudi Arabia; Summer 2027; kfupm.edu.sa)

Research opportunities for international students. Spring 2027 exchange + 8-week paid Aramco internship.

36. KAUST VSRP (Saudi Arabia; Rolling admissions; admissions.kaust.edu.sa)

3–6 month visiting student research program in STEM fields.

37. KAUST Global Fellowship (Saudi Arabia; Opens 1 Sep 2026; kgfp.kaust.edu.sa)

For early-career researchers including final-year PhDs.

38. SN Bose / Khorana Programs (India; Late Oct 2026; iusstf.org)

India–US STEM/Biotech exchange. Khorana requires 1+ year remaining, CGPA 8.0+.

39. NCRA TIFR VSRP (India; ~Mid-Feb 2027; ncra.tifr.res.in)

May–July. For students entering final year of Bachelor's/Master's in Physics, Math, Electronics, Engineering.

40. IASc-INSA-NASI SRFP (India; 30 Nov 2026; ias.ac.in)

Science Academies' Summer Research Fellowship. Selection results around March–April 2027.

41. IIT Gandhinagar VSREP (India; 27 Oct 2026; iitgn.ac.in)

Semester-long (Semester II, 2026-27). For final-year students from IITs, IISc, IISERs, NITs.

42. IIT Hyderabad SURE (India; ~10 Mar 2027; iith.ac.in)

1–2 months, May–July. INR 7,500/mo (1 month), INR 15,000 total (2 months). CGPA 8.0+ for non-IITH.

43. IISc UG Research (India; 14 Apr 2027; iisc.ac.in)

Bachelor of Science (Research) programme. Exam in June 2027.

44. Amgen Scholars (Australia) (Australia; 31 Aug 2026; amgenscholars.com)

Hosted by University of Melbourne. Jan 3 – Feb 19, 2027.

45. UQ Summer Research (Australia; 11 Oct 2026; uq.edu.au)

Summer 2027 program at University of Queensland. Various projects across schools.

46. QUBIC Summer Internship (Australia; 16 Oct 2026; qubic.au)

Quantum biotechnology. Jan 13 – Feb 8, 2027. 4 weeks. 10 internships across 4 nodes.

47. SAIIA Africa Youth Research Programme (South Africa; 30 Sep 2026; saiia.org.za)

Training workshop Feb 22–26, 2027, Johannesburg. Fully funded mentorship + research support.

48. SANBI Research Internships (South Africa; 30 Oct 2026; sanbi.org)

15 biological invasions research development internships for 2027. R9,876/mo.

49. CNPEM Summer Scholarships (Brazil; 8 Sep 2026; cnpem.br)

Jan 6 – Feb 26, 2027, Campinas, São Paulo. Travel + accommodation covered. For Latin America & Caribbean students.

50. Chevening Scholarship (UK; 6 Oct 2026; chevening.org)

Full tuition + living stipend + airfare. Master's only. Requires 2+ years work experience.

51. Gates Cambridge Scholarship (UK; US: 14 Oct 2026; Intl: 8 Dec 2026 or 6 Jan 2027; gatescambridge.org)

Full cost at Cambridge. Master's/PhD. Course-specific deadlines.

52. Rhodes Scholarship (UK; Jul–Oct 2026 (varies by country); rhodeshouse.ox.ac.uk)

Full cost at Oxford. Master's/DPhil. India deadline: 23 July 2026. Germany: 10 Sep 2026. Southern Africa: 3 Aug 2026.

53. Commonwealth Scholarship (UK; Nov 2026 – Feb 2027; cscuk.fcdo.gov.uk)

Master's/PhD. For Commonwealth countries.

54. Fulbright Program (USA; Sep–Nov 2026 (varies by country); fulbrightprogram.org)

Master's/PhD. Country-specific deadlines.

55. Erasmus Mundus (Europe; Nov 2026 – Jan 2027; erasmus-plus.ec.europa.eu)

EU-funded scholarships for 2-year international master programs.

56. Australia Awards (Australia; Feb–Apr 2027 (varies); australiaawards.gov.au)

Master's/PhD for developing countries.

The Feynman Research Community Vision: A Prologue to Collaborative Science

The architecture of global scientific advancement relies heavily on the cross-pollination of emerging talent through structured research mobility programs. The modern scientific endeavor is fundamentally interdisciplinary; breakthroughs in computational biology require the synthesis of machine learning and genomics, while climate tech demands the integration of materials science, environmental policy, and chemical engineering. Recognizing this paradigm, the Feynman Research Community operates under the foundational principle that research is demonstrably superior when scholars learn and build together.

The Feynman Research Community serves as a rapidly expanding nexus for students, independent investigators, and established academics from disparate disciplines to converge. The community provides an infrastructure where participants can seamlessly exchange ideas, critically discuss emerging research literature, discover funding and placement opportunities, and secure potential co-authors. The initiative welcomes individuals at every stage of the academic pipeline, from undergraduates taking their first steps into a laboratory to postdoctoral scholars orchestrating complex, multi-national grant projects.

The core activities facilitated within this space include the rigorous discussion of peer-reviewed papers and emerging technological developments, the crowdsourcing of feedback on independent projects, and the establishment of collaborations that span across artificial intelligence, mathematics, biology, climate science, and the humanities. To democratize access to these resources and foster interdisciplinary curiosity, the Feynman Research Community maintains an active digital presence across multiple platforms:

LinkedIn: linkedin.com/company/feynman-research-community

WhatsApp: chat.whatsapp.com/FnnWNcvCNy55NPrfZEnQPI

Discord: discord.gg/Zve6Zc2gv

By championing a framework that makes research more collaborative, accessible, and interdisciplinary, the community aims to dismantle institutional silos. This comprehensive report, commissioned for the 2026-2027 academic cycle, embodies that mission, providing an exhaustive, deeply analytical guide to the world's premier research fellowships and internships.

Macro-Trends in Global Research Mobility for the 2027 Cycle

As the academic calendar pivots toward the 2026-2027 placement year, the landscape of fully funded internships, fellowships, and visiting scholarships has grown increasingly complex. Institutions have introduced more stringent eligibility criteria, highly specialized application portals, and significantly earlier deadlines, demanding that prospective applicants approach these opportunities with the rigor of professional grant writers. A careful analysis of the data driving the current placement cycle reveals several distinct shifts in how global institutions recruit, evaluate, and fund visiting scholars.

The first notable trend is the institutionalization of the "pre-doctoral pipeline." Premier research institutes increasingly view summer and semester-long internships not merely as educational outreach, but as protracted, high-stakes recruitment mechanisms for their doctoral programs. Programs like the California Institute of Technology (Caltech) Summer Undergraduate Research Fellowships (SURF) and the Okinawa Institute of Science and Technology (OIST) Research Internship are explicitly designed to test a candidate's capacity for independent hypothesis generation, methodological rigor, and academic resilience. The financial structures of these programs reflect this intensive recruitment strategy; host institutions are willing to fully subsidize international airfare, regional housing, and daily living stipends to attract candidates who rank in the absolute highest percentiles of their global cohorts.

A second overarching theme is the strict enforcement of geopolitical and diplomatic funding quotas. Global scientific collaboration is frequently bound by international treaties and domestic funding mandates. For instance, the European Organization for Nuclear Research (CERN) Technical Studentship dictates that applicants

must be nationals of CERN Member or Associate Member States. In the current cycle, applications from nationals of Pakistan, Lithuania, Latvia, Cyprus, Croatia, and Turkey are suspended because the demographic ceilings defined under Article II.5 of the Associate Membership Agreement have already been reached. Conversely, the quota for Indian nationals remains uncapped, presenting a highly strategic opportunity for students from the subcontinent. Similarly, bilateral programs such as the S.N. Bose Scholars and Khorana Programs exist strictly to bridge the academic corridors between the United States and India, funded directly by joint government initiatives.

The third dominant trend involves the divergence between structured cohort programs and autonomous mobility grants. Structured programs, like the Amgen Scholars Program or the Swiss Federal Institute of Technology in Lausanne (EPFL) Excellence in Engineering (E3) track, admit a defined class of students who undergo synchronized orientations, specialized technical workshops, and concluding symposiums. These programs provide intense scaffolding but offer less flexibility regarding project timelines. In contrast, autonomous mobility grants, such as the ThinkSwiss Research Scholarships, place the logistical and networking onus entirely on the applicant. The student must independently secure a hosting commitment from a principal investigator (PI) before applying for the financial grant, rewarding candidates who possess high levels of independence, established professional networks, and superior cold-outreach skills.

Application Strategy and Tips

- Rolling deadlines: KAUST VSRP and ISTA accept applications year-round — excellent fallback options if you miss major deadlines.

- Institution-specific deadlines: Amgen Scholars and DAAD RISE require checking individual host university deadlines even after the main program deadline.

- Citizenship restrictions: MIT MSRP is US-only; DAAD RISE is for North America/UK/Ireland; ThinkSwiss is for specific countries including India, Australia, and Pacific Islands.

- Early deadlines: Several programs close in September–October 2026 (Mitacs, NUS IRIS, QUBIC, Chevening, KAUST Winter Camp, SAIIA, CNPEM). Mark these immediately.

- Funding varies widely: CERN pays ~3,486 CHF/mo; Aalto pays 2,000+ EUR/mo; IIT Hyderabad offers INR 15,000 total; LISA charges €300 but provides travel allowance.

- Prestige vs. accessibility: Major fellowships (Chevening, Gates, Rhodes) are graduate-level and highly competitive. Summer internships are more accessible entry points for undergraduates.

- Autonomous vs. structured: ThinkSwiss and DAAD WISE require you to independently secure a host professor. Start cold-emailing 4–6 months before the deadline.
